Dr. Bobby R. Wells was born July 30, 1934, at Wickliffe, Ky. He received his B.S. degree in agriculture from Murray State University in 1959, his M.S. in agronomy from the University of Arkansas in 1961, and his Ph.D. in soils from the University of Missouri in 1964. Dr. Wells joined the faculty of the University of Arkansas in 1966 after two years as an assistant professor at Murray State University. He spent his first 16 years at the U of A Rice Research and Extension Center near Stuttgart. In 1982, he moved to the U of A Department of Agronomy in Fayetteville.

Dr. Wells was a world-renowned expert on rice production with special emphasis on rice nutrition and soil fertility. He was very active in the Rice Technical Working Group (RTWG) for which he served on several committees, chaired and/or moderated Rice Culture sections at the meetings and was a past secretary and chairman of the RTWG. He loved being a professor and was an outstanding teacher and a mentor to numerous graduate students. Dr. Wells developed an upper-level course in rice production and taught it for many years. Dr. Wells was appointed head of the U of A Department of Agronomy in 1993 and became university professor that year in recognition of his outstanding contributions to research, service, and teaching.

Among the awards he received were: the Outstanding Faculty Award from the U of A Department of Agronomy (1981), the Distinguished Rice Research and/or Education Award from the Rice Technical Working Group (1988), and the Outstanding Researcher Award from the Arkansas Association of Cooperative Extension Specialists (1992). He was named a Fellow in the American Society of Agronomy (1993) and was awarded, posthumously, the Distinguished Service Award from the RTWG (1998).

Dr. Wells edited this series when it was titled Arkansas Rice Research Studies from the publication’s inception in 1991 until his death in 1996. Because of Dr. Wells' contribution to rice research and this publication, it was renamed the B.R. Wells Rice Research Studies in his memory starting with the 1996 series.
Dr. John F. Robinson was born March 24, 1943 in Columbia, La., and raised in the small town of Grayson, La. His father was a vocational agriculture teacher, advisor to the Future Farmers of America, and instrumental in fostering John’s interest in agriculture. John was very active in FFA and 4-H. His FFA project was a herd of Poll Hereford cattle and his 4H project was showing hogs and sheep at parish and state fairs.

In 1961, John enrolled at Northeast Louisiana University at Monroe, La., and in 1963 transferred to Louisiana State University, Baton Rouge, La. He graduated from LSU in 1965 with a B.S. degree in Pre-Med. In 1965, John began working in the USDA-ARS Rice Insects Research Project as a student worker and taking graduate courses in entomology. In 1966, he accepted a temporary position with USDA-ARS in Baton Rouge as a lab technician in the rice insects project. In 1967, John accepted a permanent laboratory technician position with USDA-ARS at the European Corn Borer Laboratory located at Ankeny, Iowa. This position offered the opportunity to work full-time and continue his education in entomology. He received his Ph.D. degree in entomology from Iowa State University, Ames Iowa, in 1974. In 1975, Dr. Robinson transferred to the USDA-ARS Vegetable Laboratory in Charleston, S.C., and conducted research on vegetable insects until the end of 1977.

In December of 1977, John was able to return to the familiar surroundings of Louisiana when he accepted the position of research scientist with USDA-ARS at the Rice Station in Crowley, La., conducting research on rice insects. He had a wonderful research career at the LSU Rice Station and was a major contributor in the control of the rice water weevil and stink bug in the southern United States. He was always very practical in his scientific approach to solving problems and was most interested in solving real-world problems. His research helped to set the economic thresholds for controlling the rice water weevil and stink bug in commercial fields not only in Louisiana, but also in the other southern states.

Although John enjoyed and was quite successful as a rice researcher, he also had interests in administration and thought he could help the rice industry in that capacity. Consequently, in the summer of 1989 he applied for, was offered, and accepted the position of Director of the University of Arkansas Rice Research and Extension Center located near Stuttgart, Ark. Dr. Robinson brought a fresh perspective to the Rice Research and Extension Center. His positive and people-oriented approach helped him to encourage rice research and extension personnel to work closely together to solve rice producer’s problems. He was a committed, unselfish leader who always took great pride in the accomplishments of the scientists and staff at the Rice Research and Extension Center.
Center and supported them well. His number one priority as the resident director was how the Rice Research and Extension Center could help improve the rice industry. He retired as Director of the University of Arkansas Rice Research and Extension Center in the fall of 2001.

Dr. John Robinson had many accomplishments while directing the Rice Research and Extension Center. He encouraged the expansion of the rice nursery in Puerto Rico to include Mississippi and the USDA-ARS group at the Dale Bumpers National Rice Research Center; this nursery has been very beneficial to the southern United State rice industry. John was instrumental in helping to make the Dale Bumpers National Rice Research Center more than a dream: a reality. Through this center the tools of biotechnology can now be integrated into the rice breeding program. John was active in several organizations on the local and national scale. He was a member of the Rotary and Ruritan clubs in Stuttgart, he served as Secretary, Vice President, and President of the Research Centers Administrators Society, and he was very active in the Rice Technical Working Group where he served on numerous committees and held the offices of Secretary/Program Chair and Chairman. During his career Dr. Robinson received Riceland Food’s prestigious Friend of the Farmer Award and Distinguished Service Awards from the Rice Technical Working Group and the Research Centers Administrators Society.

Upon retirement John and his wife, Sarah, moved back to the small town of Grayson, La. Both are actively involved in the Grayson United Methodist Church. Sarah serves as treasurer and John is serving as lay leader and president of the Grayson United Methodist Men. They also do a monthly church newsletter. He is a member of the Caldwell Parish Industrial Board and is presently serving as its president, and is a board member of the Northeast Louisiana Economic Alliance. Always with an eye to the future, John is presently serving as president of the Welcome Home Cemetery Association. He recently volunteered to lead “insect safaris” for 3rd to 6th graders to help raise money to support the Martin Home Place which is listed on the National Historic Register.

John and Sarah’s two children live in the same community. They spend a lot of time with their family and especially with Dillon, their eight year-old grandson. Dillon is presently trying to teach his grandparents how to get past the first level in “Lord of the Rings” on the Play Station and a few basic Taekwondo moves. They have a couple of houses built in the mid-to-late 1920s that they are renovating. John likes to fish and still makes the annual sailing of the “Perch Fleet” to fish with his Iowa State friends in Minnesota. John said when he retired that he was looking forward to a lot of fishing and reading. Oh well, maybe next year.
This publication is available on the AAES website at:
www.uark.edu/dept/agripub/Publications/researchseries/
Research reports contained in this publication may represent preliminary or only a single year of results; therefore, these results should not be used as a basis for long-term recommendations.

Several research reports in this publication will appear in other Arkansas Agricultural Experiment Station publications. This duplication is the result of the overlap in research coverage between disciplines and our effort to inform Arkansas rice producers of all the research being conducted with funds from the rice check-off. This publication also contains research funded by industry, federal, and state agencies.

Use of products and trade names in any of the research reports does not constitute a guarantee or warranty of the products named and does not signify that these products are approved to the exclusion of comparable products.

All authors are either current or former faculty, staff, or students of the University of Arkansas Division of Agriculture, or scientists with the United States Department of Agriculture-Agricultural Research Service. For further information about any author, contact Communication Services, (501) 575-5647.
CONTENTS

OVERVIEW

Trends in Arkansas Rice Production
C.E. Wilson Jr. and J.W. Branson ................................................................. 15

BREEDING, GENETICS, AND PHYSIOLOGY

Advancements in Marker-Assisted Selection Methods and Applications
V.A. Boyett, J.W. Gibbons, J. Jiang, and K.A.K. Moldenhauer ......................... 25

Continued Evaluation of Blast Resistance Genes in Rice Wild Relatives
(Oryza spp.) and Unique Rice (O. sativa) Accessions
G.C. Eizenga, H.A. Agrama, F.N. Lee, and Y. Jia .............................................. 30

‘Cybonnet’, a Semi-Dwarf Long-Grain Rice Cultivar
J.W. Gibbons, K.A.K. Moldenhauer, K. Gravois, F.N. Lee, J.L. Bernhardt,
J.-F. Meullenet, R. Bryant, R.J. Norman, R. Cartwright, M. Anders,
K. Taylor, J. Bulloch, and M.M. Blocker ....................................................... 38

‘Medark’, a Semi-Dwarf Medium-Grain Rice Cultivar
J.W. Gibbons, K.A.K. Moldenhauer, K. Gravois, F.N. Lee, J.L. Bernhardt,
J.-F. Meullenet, R. Bryant, R.J. Norman, R. Cartwright, M. Anders,
K. Taylor, J. Bulloch, and M.M. Blocker ....................................................... 44

‘Spring’, a Very Early Long-Grain Rice Variety
Wilson, Jr., R. Cartwright, R.J. Norman, R. Bryant, M.M. Blocker, V. Boyett, K.
Taylor, and J.M. Bulloch .............................................................................. 49

Growth Stages of 12 Rice Cultivars (Oryza sativa L.) Expressed in
DD50 Thermal Heat Units
N.T. Watson, P.A. Counce, and T.J. Siebenmorgen .................................... 56

Agronomic Evaluation and Seed Stock Establishment of the USDA
Rice Core Collection
Evaluation of Kernel Characteristics of the USDA Rice Core Collection
W.G. Yan, J.N. Rutger, H.E. Bockelman, and T.H. Tai

PEST MANAGEMENT: DISEASES

Effect of Preventative Fungicide Application on Rice Yield, Milling, and Return
R.D. Cartwright, T. Windham, C.E. Parsons, E.A. Sutton, J. Allen, and C.E. Wilson

Opportunities for Variable-Rate Fungicide Application in Rice

Two Major Resistance Genes Confer Resistance to Race Shift Isolates
Overcoming Blast Resistance Gene Pi-ta

Flood-Induced Field Resistance in Drew and Related Pi-ta Gene Varieties
Compromised by New Blast Races
F.N. Lee, M.P. Singh, and P.A. Counce

A Preliminary Characterization of the Rice Blast Fungus on ‘Banks’ Rice

Pathogenic, Molecular, and Genetic Diversity Among Bipolaris, Drechslera, and Exserohilum Species on Rice
I. Ouedraogo, J.C. Correll, E.J. Boza, R.D. Cartwright, F.N. Lee, and P. Sankara

Reaction of Cold-Tolerant Rice Genotypes to Seedling Disease Caused by Pythium Species

Real-Time PCR Detection and Quantification of the Rice Sheath Blight Pathogen Rhizoctonia solani
R.J. Sayler and Y. Yang

Evaluation of Seedborne Rice Blast Thresholds in Arkansas
D.O. TeBeest
Studies on Isolates of *Rhizoctonia solani* from Arkansas for Management of Rice Sheath Blight Disease
Y.A. Wamishe, Y. Jia, P. Singh, and R.D. Cartwright ........................................ 142

Evaluation of Rice Varieties for Performance and Disease Reaction on Farms
C.E. Wilson, Jr., R.D. Cartwright, J.W. Gibbons, A.L. Richards,
D.L. Frizzell, J.W. Branson, S. Runsick, and C.E. Parsons .................................... 149

**PEST MANAGEMENT: INSECTS**

Screening Rice Lines for Susceptibility to Rice Stink Bug: Results from the Arkansas Rice Performance Tests
J.L. Bernhardt, K.A.K. Moldenhauer, and J.W. Gibbons ...................................... 159

**PEST MANAGEMENT: WEEDS**

Outcrossing Potential of Clearfield® Rice Varieties with Red Rice
N.R. Burgos, V.K. Shivrain, M.A. Sales, and M.M. Anders ..................................... 167

Postemergence Herbicide Programs for Control of Non-Traditional Broadleaf Weeds in Rice
A.T. Ellis, B.V. Ottis, R.C. Scott, and R.E. Talbert ............................................... 176

Rice Cultivar Rooting Tolerance to Penoxsulam
A.T. Ellis, B.V. Ottis, R.C. Scott, and R.E. Talbert ............................................... 180

Growth, Development, and Physiological Characteristics of Selected Red Rice (*Oryza sativa*) Accessions from Arkansas
D.R. Gealy ........................................................................................................ 184

Identifying Red Rice Crosses in Arkansas Rice Fields
D.R. Gealy, L.E. Estorninos, Jr., and C.E. Wilson .............................................. 201

Environmental Implications of Pesticides in Rice Production
J.D. Mattice, B.W. Skulman, and R.J. Norman .................................................... 210

Rice Tolerance and Weed Control with Penoxsulam Herbicide

Crop Tolerance and Efficacy of Imazamox in Clearfield Rice
K.B. Meins, R.C. Scott, R.E. Talbert, and K.L. Smith ........................................... 224
Reducing Seeding Rates with Modern Rice Cultivars as a Function of Barnyardgrass Control
B.V. Ottis, R. E. Talbert, and A.T. Ellis ................................................................. 228

Performance of Residual Rice (Oryza sativa) Herbicides as Affected by Soybean (Glycine max) Crop Residue
R.C. Scott, K.B. Meins, K.L. Smith, and N.D. Pearrow ........................................ 235

Planting Time and Cultivar Effects on Outcrossing in Clearfield Rice
V.K. Shivrain, N.R. Burgos, M.A. Sales, and D.R. Gealy ........................................ 240

RICE CULTURE

The Effect of Rotation, Tillage, Fertility, and Variety on Rice Grain Yield and Nutrient Uptake
M.M. Anders, T.E. Windham, K.B. Watkins, K.A.K. Moldenhauer,
J. Gibbons, R.W. McNew, and J. Holzhauer ...................................................... 250

2004 Rice Research Verification Program
J.W. Branson, C.E. Wilson, Jr., T.E. Windham, and J. Marshall ....................... 259

Short-Term Impacts of Land Leveling on Soil Physical and Biological Properties
K.R. Brye .................................................................................................................. 269

Evaluation of Several Indices of Potentially Mineralizable Soil Nitrogen on Arkansas Silt Loam Rice Soils
J.T. Bushong, R.J. Norman, W.J. Ross, N.A. Slaton, and C.E. Wilson, Jr. ...... 276

Ammonia Volatilization and Grain Yield by Delayed Flood Rice Utilizing Conventional and Conservation Tillage Practices
B.R. Griggs, R.J. Norman, C.E. Wilson Jr., and N.A. Slaton ............................ 282

A Comparison of Helena Chemical’s Two CoRoN Liquid N Sources to Urea for Use at Midseason in Drill-Seeded, Delayed-Flood Rice
R.J. Norman, C.E. Wilson Jr., and N.A. Slaton .................................................. 290

Grain Yield Response of Eight New Rice Cultivars to Nitrogen Fertilization
Boothe, K.A.K. Moldenhauer, and J.W. Gibbons ............................................. 295

Zinc Fertilization of Rice Grown on Clay Soils in Arkansas
N.A. Slaton, J. Branson, C.E. Wilson, Jr., R.J. Norman, and R.E. DeLong ...... 305
Rice Response to Phosphorus and Potassium Fertilization in Arkansas
N.A. Slaton, R.E. DeLong, C. Baquireza, R.J. Norman,
C.E. Wilson, Jr., and B.R. Golden ................................................................. 310

The Nitrogen Fertilizer Value of Preplant-Incorporated Poultry Litter for Flood-Irrigated Rice
N.A. Slaton, B.R. Golden, K.R. Brye, R.J. Norman, T.C. Daniel,
R.E. DeLong, and J.R. Ross ................................................................. 319

Rice Response to Boron Application Rate and Time in Arkansas, Louisiana,
Mississippi, and Missouri

Rice Irrigation-Water Management for Water, Labor, and Cost Savings
P. Tacker and W. Smith ............................................................................. 332

Development Degree Day 50 Thermal-Unit Thresholds for New Rice Cultivars
C.E. Wilson, Jr., R.J. Norman, K.A.K. Moldenhauer, J.W. Gibbons,
and A. Richards .......................................................................................... 337

Influence of Simulated Hail Injury to Rice at Seedling Growth Stages
C.E. Wilson Jr., D.L. Frizzell, N.A. Slaton, R.J. Norman, and A.L. Richards .. 345

RICE QUALITY AND PROCESSING

Moisture Adsorption Effects on Rice Milling Quality of Current Cultivars
R.C. Bautista, T.J. Siebenmorgen, and R.M. Burgos .................................. 351

R.C. Bautista, T.J. Siebenmorgen, A. Mauromustakos, and R.M. Burgos ...... 357

Milling Quality Trends with Harvest Moisture Content and the Relationship to Individual Kernel Moisture Content Distribution
R.C. Bautista and T.J. Siebenmorgen .......................................................... 364

Prediction of Cooked Rice Texture in Long-Grain Rice Using Rapid Visco Analyser Data
W.-K. Chung and J.-F. Meullenet .................................................................. 371

The Effects of Kernel Damage Caused by Combine Harvester Settings on Milled-Rice Free Fatty Acid Levels
D.J. Feliz, A. Proctor, M.A. Monsoor, and R.L. Eason .................................. 380
Comparison of Instrumental Tests for the Assessment of Cooked Rice Texture and Their Correlations to Sensory Profiles  
A. Han, W.-K. Chung, and J.-F. Meullenet ............................................................... 387

Influence of Kernel Thickness on Yellowing of Rough Rice  
A.L. Matsler, T.J. Siebenmorgen, and A.L. Couch ............................................... 395

Changes in Pasting Properties of Rice Constituents During Storage  
M. Saleh, and J.-F. Meullenet ........................................................................ 405

Predicting Rice Bulk Physicochemical Properties Using Weighted-Average Properties of Thickness Fractions  
T.J. Siebenmorgen and R.C. Bautista ............................................................... 413

Explaining Head Rice Yield Variation Using Historical Weather Data  
N.T. Watson, P.A. Counce, T.J. Siebenmorgen, and K.A.K. Moldenhauer........ 425
